

QMK/VIA Download Guide

1. Download the JSON file

Download the JSON configuration file **specific** to your Redragon QMK keyboard model.

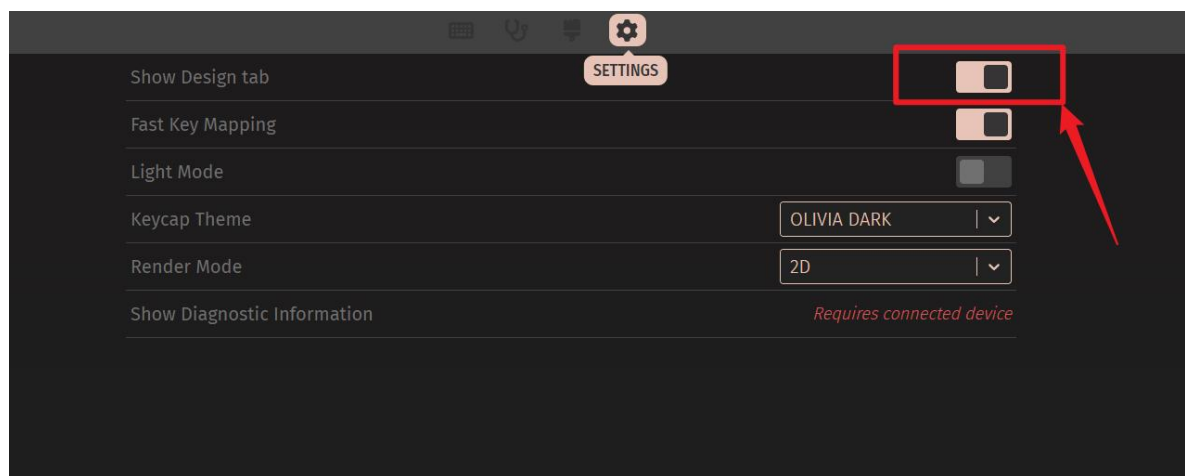

*This file works on **both Windows and macOS**.

 ALCOR K717 PRO.json

 FINKE K715 PRO.json

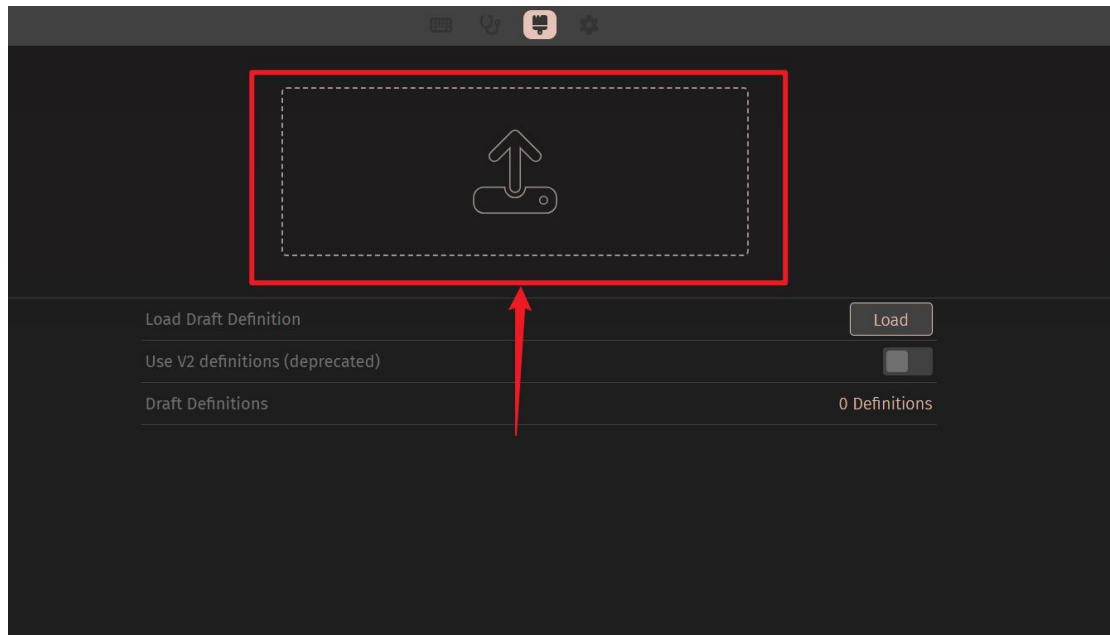

2. Access the VIA web software

Go to the VIA online interface at <https://usevia.app/>. In the “**Settings**” tab, enable the **Design tab** option.

3. Upload the JSON file

In the **Design tab**, upload the **JSON file** you downloaded for your specific keyboard model.

4. Authorize your device

In the **Configure** tab, click "**Authorize device+**." Then, in the pop-up connection window, select the correct keyboard model to complete the process.
